A;Yoneya, T: Tahara, T: Nagao, K.; Yamada, Y.; Yamamoto, T.; Osawa, M.; Miyatani, S.; A
J. Biochem. 129, 27-34, 2001
A;Title: Molecular cloning of Delta-4, a.new mouse and human notch ligand.
A;Reference number: JC7569; MUID: 21064937; PMID:11134954
A;Accession: JC7570
A;Molecule type: mRNA
A;Residues: 1-685 < YONs
A;Cross-references: UNIPROT:Q9NR61; DDBJ:AB043894
C;Comment: This protein, a member of the Notch family of proteins, is a transmembrane recates the Notch signaling, the growth or differentiation of vascular endothelial cells.
C;Genetics:
A;Gene: delta-4
C;Superfamily: delta-4 protein; EGF homology
C;Keywords: transmembrane protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Osawa, M.; Miyatani, S.; 1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           18;

Delta-like protein 1 precursor (Drosophila Delta homolog 1) (Delta1)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            FUNCTION: May be involved in cell-to-cell communication in mammalian embryos. May have a role in cellular interactions underlying somitogenesis and development of the nervous system. SUBCELLULAR LOCATION: Type I membrane protein.
TISSUE SPECIFICITY: In the embryo, expressed in the paraxial mesoderm and nervous system. Expressed at high levels in adult heart and at lower levels, in adult lung.
DEVELOPMENTAL STAGE: Expressed until day 15 in the embryo. Expression then decreases and increases again in the adult. SIMILARITY: Contains 8 EGF-like domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                             Eukaryota, Metazoa, Chordata, Craniata, Vertebrata, Buteleostomi,
